

Release Notes

April 8th, 2011

Enhancements

Community Announcements: Administrators are able to attach documents to announcements. The notification that is sent to members contains a listing of the documents with direct links to them.

IEP Integration: Permissions can be set at the corporation level to provide access to the new IEP Program that will be released this spring.

IEP Integration: Learning Connection has been modified to support accounts that exist at the corporation level in preparation for integration with the new IEP program.

Users are able to download files using the Safari browser for Mac.

STN Locator: Administrators now have a location to enter an STN to find out what school(s) the student is at within Learning Connection, based on Real-Time and direct uploads to the system. This report also reports the school of record that the system uses for ISTAR.

ISTAR_KR: There is a new report, the Data Summary table

ISTAR: Administrators now have the function to Add, Reassign, and Remove a group of students

ISTAR: The Annual Alternate Student Report (Parent Report) has been re-displayed.

ISTAR: The Annual Alternate Student Report now has the grade level the student was assessed at listed at the top of the report.

ISTAR: The year has been added to the header of the Annual Alternate Student Report

ISTAR: IDOE Administrators have the ability to add/edit cut scores

Registration: Educators are allowed to register for a corporation

Administration: Admins are able to approve membership at the corporation level. In addition, removing membership at the corporation level will remove membership/permissions for all schools in that corporation.

Accounts: Educators are now able to request to join a corporation from within the system without being members at an individual school. Members of schools are still by default members of the corporation.

Registration: Educators are now able to request membership to a corporation and no longer required to join a school within that corporation

Administration: Deactivate Existing Students has been removed as an option when uploading students to Learning Connection. Students will be removed from schools within based on the DOE-RT (Real Time) and latest upload to each school within LC.

Communities: Lessons: Admins are now able to organize lessons within folders of user-created communities.

Communities: Administrators are able to disable the Messages tab of each community

Communities: Administrators are now able to edit the title of a forum.

Communities: An icon has been added to help distinguish between communities open to everyone and closed communities.

SPN: When two School Personnel Numbers are merged in the Application Center, the SPN on the educator's account in Learning Connection is updated
